

AIM Laser

Plate & 3D Tube Laser Cutting

Aim laser offer full service laser cutting of all grades of steel, aluminium, stainless steel and gal in both tubular and plate profiles. Our Toowoomba workshop can process most plate metals up to 40mm thickness and all tubular profiles including SHS, CHS, RHS, Angle and PFC (see details over page). Our 180 tonne, 4m brake press can press most parts we cut.

We offer a fast turn around of 5 to 7 business days from receipt of PO and can either supply the material we cut, or cut material you supply. Please contact us for a quote to experience our competitive pricing.

AIM Laser

Plate & 3D Tube Laser Cutting

Tube Laser Capability

Section	Size	Length
SHS	20x20 - 150x150mm	9m
RHS	20x20 - 200x100mm	9m
CHS	19mm - 219mm	9m
Angle	25x25 - 150x150mm	9m
PFC	75 - 150mm	9m
Oval	All sizes	9m

Material Capability (wall thickness)	
Steel & Galvanised	≤14mm
Stainless Steel	≤5mm
Aluminium	≤6mm

Plate Laser Capability

Material	Max Thickness
Mild Steel	≤40mm
Hardened Steel (various)	≤40mm
Stainless Steel	≤25mm
Aluminium	≤20mm
Galvanised	≤40mm
Others	Please Ask

Bed Size	
All Materials	4m x 2m
